

UK SCHOOLS CYBER INSURANCE SCHEME

Simplifying cyber insurance for the education sector

"Safeguarding our pupils, staff, and school community is one of our highest priorities. In today's digital environment, cyber risk is no longer theoretical, it is a real and growing threat to schools of all sizes.

The UK Schools Cyber Insurance Scheme has given us genuine confidence that we now have accessible, robust, affordable and sector-specific protection not just financially, but operationally. Every Maintained School Governor and Head has a duty to ensure fair value for money and signs an annual SFVS.

Knowing that specialist cyber incident response, legal and data protection expertise are immediately available is invaluable. It allows school leaders to focus on education, not crisis management, and provides governors with assurance that we are meeting our responsibilities around risk, resilience, and accountability.

I would encourage governing bodies and school leaders to give serious consideration to this scheme. It represents a proactive, responsible approach to cyber risk and demonstrates a clear commitment to protecting our schools, our data, and our communities."

Malcolm Richards – School Governor, Chair Worcestershire Schools Forum

UK SCHOOLS CYBER INSURANCE SCHEME

A SIMPLE PRICING MODEL

The program offers pre-set pricing based solely on your school's revenue, with no complex application and no subjective assessments.

Premiums are structured across eight revenue tiers, starting from schools with up to £1m in revenue and scaling up to £10m, so you'll always know exactly which band applies to you.

To find out your premium, get in touch or go to company-x.com/schools-scheme/ for an **instant quote**.

Premium is subject to 12% IPT and £60 insurers fee.

EXTENSIVE COVERAGE

BREACH RESPONSE

Investigation, helplines and notifications to manage a cyber incident.

EXTORTION COST

Ransom payments and investigation costs following a cyber breach.

REPUTATIONAL HARM
